

## More About Brian

### **Experience:**

A lot of what I know is from years of hands on training and learning from other technicians in the industry. I am MHA (Multi Housing Association) certified for maintenance work and I have received my Boilers License and also my Universal Refrigerant certificate to work on and repair air conditioners.

### **How long with Gramercy Eagan:**

I have been with the property for nine years total. I started by maintaining two buildings during the first two years but due to raising work load at Gramercy Eagan and the residents at Gramercy Eagan wanting a more permanent maintenance technician the other building was dropped from my duties and I was placed at Gramercy Eagan five days a week plus 24 hour call.

### **Interesting facts:**

The residents that live here have truly become family to me and mine. When I started working here I was single and was dating my future wife. Through the years I have gotten married, had two boys and evolved into the family man. The residents here have become close to me and my family by letting us experience holidays with them, coming to my wedding, throwing a baby shower for my wife and taking a true interest in my life. By that being said I try and do what I can to reciprocate that to each one of them.
